

From Villa Savoye to Smart Homes: Evolution of Functional Living

Prof. L. Dubois

April 15, 2026

Jeanneret Architecture Forum

Villa Savoye and Modernist Ideals

- Designed by Le Corbusier in 1929
- Embodiment of the “Five Points of Architecture”
- Open floor plan and free facade
- House as a “machine for living”

From Function to Technology

- Evolution of functional design in the 20th century
- Integration of appliances and automation
- Rise of user-centered and adaptable spaces
- Early concepts of connected living environments

Smart Homes Today

- IoT-enabled devices and home automation systems
- Energy efficiency and sustainability
- Personalized environments through data
- Continuing the vision of functional, human-centered living
